

FLEXSTIK® Specialty Thin Tapes for Flexographic Plate Mounting

Product	Adhesion	Thickness	Carrier	Adhesive	Liner	Features/Applications
FS-310 Wide web mounting tape for compressible and hard cushion sleeves.	High adhesion, high final bond.	.0050" (.12mm)	Clear UPVC film.	Rubber resin liner and open side.	Manila paper.	Wide web flexible packaging tape for photopolymer and rubber plates.
FS-4310 Narrow web mounting tape for compressible and hard cushion sleeves.	High adhesion, high final bond.	.0050" (.12mm)	Clear UPVC film.	Rubber resin liner and open side.	Corrugated, fluted brown film.	Narrow web plate attachment, thin plate letterpress and flexo plate mounting for photopolymer and rubber plates.
RLT-4-EP Narrow web and rotary letterpress. Corrugated plate and compressible sleeve mounting.	Medium adhesion, medium final bond.	.0040" (.10mm)	Clear UPVC film.	Rubber resin liner and open side.	Soft blue, fluted PP film.	Corrugated bubble-free mount, narrow web plate attachment, thin plate letterpress and flexo plate mounting for photopolymer and rubber plates.
FS-23 Corrugated plate mounting tape.	Permanent adhesion, permanent final bond.	.0045" (.11mm)	Clear polyester film.	Acrylic liner and open side.	White, lay-flat, siliconized paper.	Thick plate, corrugated, flexo plate mount for photopolymer and rubber plates. Attachment to PVC or PET mounting materials.
FS-25 Corrugated plate mounting tape.	Medium adhesion, medium final bond.	.0030" (.07mm)	Clear polyester film.	Acrylic liner and open side.	White, lay-flat paper.	Thick plate, corrugated, flexo plate mount for photopolymer and rubber plates.
FS-51 Corrugated plate mounting tape.	Initial reposition adhesion, permanent final bond.	.0030" (.07mm)	Clear polyester film.	Rubber liner and open side.	White, lay-flat, siliconized paper.	Thick plate, corrugated, flexo plate mount for photopolymer and rubber plates. Attachment to PVC or PET mounting materials.
FS-67 Fiber-filled adhesive transfer, corrugated plate mounting tape.	Medium tack adhesive bond.	.0020" (.05mm)	Unsupported adhesive film.	Acrylic adhesive, fiber filled.	Brown, polyccated, lay-flat paper.	Thick plate, corrugated, flexo plate mount for photopolymer and rubber plates. Attachment to PVC or PET mounting materials.
FS-68 Fiber-filled adhesive transfer, corrugated plate mounting tape.	High tack adhesive bond.	.0020" (.05mm)	Unsupported adhesive film.	Acrylic adhesive, fiber filled.	Brown, polyccated, lay-flat paper.	Thick plate, corrugated, flexo plate mount for photopolymer and rubber plates. Attachment to PVC or PET mounting materials.
FS-385 Fiber-filled adhesive transfer, corrugated plate mounting tape.	High tack adhesive bond.	.0050" (.12mm)	Unsupported adhesive film.	Acrylic adhesive, fiber filled.	White, lay-flat, siliconized paper.	Thick plate, corrugated, flexo plate mount for photopolymer and rubber plates. Attachment to PVC or PET mounting materials.

*Typical variations contained in above statements should not be used in writing specifications. Actual testing should be done by the user to determine suitability. All information, recommendations and descriptive material about Adheso-Graphics products are based upon research, and are believed to be, but do not constitute a warranty. All AGI materials are sold with the understanding that purchasers will independently determine the suitability of these products for their purposes.
