

Flex Series™ Flexographic Cushion-Plate Mounting Tapes

Double-Sided Poly Foam, Standard Thickness

FlexSeries™ from Adheso-Graphics delivers consistent, high-quality print performance through multi-density, high-recovery PE foam and multi-layer reinforcement films for stable, lay-flat application. Designed for wide-web and flexible packaging using photopolymer or rubber plates, these tapes provide balanced compression, reliable adhesion, and long-life reproduction. Each tape has its own application range, depending upon graphics or material printed.

Product	Width	Nominal Thickness	Backing	Liner	Application
Flex ML20 Ultra-High Adhesion	18" (457mm) 54" (1372mm)	0.020" (0.51mm)	PE Foam Pink	Clear Pebble OPP Film	MEDIUM LOW DENSITY For use with primary image high line screen, in combination with fine dot and solid type flexographic printing.
Flex ML15 High Adhesion	18" (457mm) 54" (1372mm)	0.015" (0.38mm)	PE Foam Pink	Clear Pebble OPP Film	
Flex MD20T High Adhesion	18" (457mm) 54" (1372mm)	0.020" (0.51mm)	PE Foam White	T-Pattern OPP Film	MEDIUM DENSITY Recommended for use in combination type printing, where process and solid ink coverage are reproduced as one image.
Flex MD20 Ultra-High Adhesion	18" (457mm) 54" (1372mm)	0.020" (0.51mm)	PE Foam White	Clear Pebble OPP Film	
Flex MH20T High Adhesion	18" (457mm) 54" (1372mm)	0.020" (0.51mm)	PE Foam Green	T-Pattern OPP Film	MEDIUM HIGH DENSITY Recommended for solid tone coverage, where primary image graphics are reproduced as solid coverage with minimal process enhancement.
Flex MH20 Ultra-High Adhesion	18" (457mm) 54" (1372mm)	0.020" (0.51mm)	PE Foam Green	Clear Pebble OPP Film	
Flex HD20T High Adhesion	18" (457mm) 54" (1372mm)	0.020" (0.51mm)	PE Foam Blue	T-Pattern OPP Film	HIGH DENSITY For use in dense tonal reproduction of solid image area, where absorbent substrates or maximum block ink coverage is required.
